WORK EXPERIENCE

<i>Current</i> JULY 2018	Haskell Engineer at KADENA , Brooklyn, NY <i>PLT, Distributed Systems, Formal Verification</i> Lead maintainer of the Pact smart contract language, a Lisp-like implementation of System F with Hindley-Milner type inference and a formal verification suite. Working on Coq verified denotational semantics of the language (discarded). Senior contributor to Proof-of-Work blockchain (Chainweb), and a permissioned Byzantine Fault-Tolerant blockchain (Kuro).
2017-2018	Senior Software Developer at CAKE SOLUTIONS, NYC <i>Distributed Systems at Scale</i> Streaming architecture and distributed systems for Disney Streaming (a Cake Solutions client), working on the ESPN livestream and VOD architecture. This role was primarily functional programming in Scala, with Haskell PoC's, serving millions of concurrent users daily. Focus was on the DRM protocols and Ad Services.
2015-2017	Consultant/Expert Advisor at PLATINION NORTH AMERICA (A BCG COMPANY), NYC Data analysis, CCAR audit, audit consulting, model validation, reverse model engineering, technical documentation, statistical analysis
2015-2015	Operations Analyst at GOLDMAN SACHS, Salt Lake City FX confirmations group

EDUCATION

MAY 2014 Bachelor of Science in MATHEMATICS, **University of Utah**, Salt Lake City
Emphasis on Topology and Geometry | Major: Mathematics
Achievements include: TA for Introduction to Algebraic Topology II (MA5520) , participant in student lecture series giving talks on the following:
- The Word distance, Hyperbolic Groups, and the Milnor-Svarc lemma
- Simplicial, Singular, and Cellular Homology
- The Baire Category Theorems
- Geometric Group Theory

VOLUNTEERING + EXTRACURRICULARS

FEBRUARY 2019-2019	Applied Category Theory (ACT) School
JANUARY 2019-Present	Lambda Conf committee member
JANUARY 2019-Present	Haskell.org committee member
APRIL 2018-Present	Board-member of Functional Conf, Bengaluru

TALKS

September 2019 Scala World	<i>Type Arithmetic and the Yoneda Lemma</i> 90-min talk building a notion of arithmetic in Cartesian Closed Categories with special emphasis on the philosophical perspective of reasoning via the Yoneda Lemma and Leibniz Principles. Talk
June 2019 LambdaConf	<i>Isomorphic Reasoning</i> A 6-hour workshop building the foundational knowledge to understand "type arithmetic" in Cartesian Closed Categories, with special emphasis on proofs via the Yoneda lemma. Talk
June 2019 LambdaConf	<i>Adjunctions and Free Constructions</i> A 90-min talk teaching the fundamentals of adjunctions and free constructions in Category Theory. Talk
January 2019 SBC	<i>Formally Verified Smart Interfaces</i> A 5-minute lightning talk at Stanford Blockchain Conference detailing recent innovations I'd made in formally verifying smart contract interfaces (think Haskell typeclasses with laws!). Video

PATENTS

NOVEMBER 2018 KA02-004-UT-01US-PRO1 - Formally verified smart contracts (co-author)

PUBLICATIONS

JULY 2018 *Profunctor Optics: a categorical update* ([arxiv/2001.07488](#))
FEBRUARY 2020 *Profunctor Optics: The Categorical View* ([n-category cafe](#))

OPEN SOURCE CONTRIBUTIONS

Author: LENS-PROCESS, MICROLENS-PROCESS, NONEMPTY-VECTOR
 BASE64, BASE64-LENS, BASE32, BASE32-LENS, BASE16
 BASE16-LENS
Maintainer: PACT, CHAINWEB, STRICT-TUPLE, BASE64-BYTESTRING,
 BASE16-BYTESTRING
Collaborator: LENS
Previously Maintained: SCALAZ, ZIO

MEETUPS

LEADER: NY Homotopy Type Theory (HoTT) meetup
CO-ORGANIZER: NY Haskell User Group, NY Category Theory Meetup
PARTICIPANT: CUNY Graduate Category Theory Seminar

LANGUAGES

ENGLISH: Primary
SPANISH: Conversant
FRENCH: Basic Knowledge

ACADEMIC INTERESTS

My current academic focus is building towards understanding Homotopy Theory, Algebraic Topology, and Category Theory. I like finding geometry in strange places! Currently, I am partnered with Igor Popov, working on category-theoretic models for System F, GADTs, and parametricity.

OTHER INTERESTS AND ACTIVITIES

Trail Hiking, Music (I am a fairly competent Latin Jazz guitarist), hobbyist electronics engineer (building guitar amplifiers and electronics components for guitar).
